

Benefits of NetOne Hosted Exchange Server

Anywhere, Anytime Access

Access your FULL mailbox, calendar, contacts, and public folders – not just inbox or email folders from:

- ✓ **Microsoft Outlook** – home and work
- ✓ **Any Web Browser** – you can continue to use your favorite web browser
- ✓ **Mobile Devices**
 - BlackBerry Smartphones, iPhone, Treo, Windows Mobile handhelds
 - 2-way wireless synchronization for email folders, contacts, calendar, notes and tasks

Get More Done

Increase productivity:

- ✓ **Calendar Sharing** – saves hours when scheduling meetings
- ✓ **Delegation** – assistants can manage other team members' mailboxes
- ✓ **Public Folders** – create department, team, project, or customer folders that have their own calendar, contact, emails, files – all accessible by any user in the group

Peace of Mind

Up to 70% of business data resides in email. Temporary or permanent loss of email means lost productivity, lost customers, and lost revenue.

- ✓ **Backups** – we do daily backups, monitored closely, and routinely tested
- ✓ **Off-Site Storage** – if a user loses a hard drive, no Outlook data is lost. The entire mailbox is easily recreated on a new PC
- ✓ **Server Maintenance** – we take care of all upgrades, security patches and routine maintenance
 - Custom software to make Exchange Server more robust
 - Intensive continuous monitoring to quickly detect issues and page a system administrator to resolve them before they become problems.
